WORKSHOP

Building and Monitoring a Serverless App on AWS

	AJ Stuyvenberg
	Engineering Lead | Datadog

	Maxime David
	Senior Software Engineer | Datadog

Skill level	Intermediate
Date & location	October 18 2:00PM EDT Room 408

In this workshop, you'll learn how to use Datadog to trace through popular AWS managed services like API Gateway, SNS, and SQS—and how you can use these insights to successfully operate your serverless services at scale. You'll see this firsthand by designing, deploying, and monitoring a fully serverless GitHub bot.
