### Meet Your New BFF: Backend to Frontend without the Duct Tape

Score 0.19

### Developer Joy – How great teams get s%\*t done

Score 0.19

### Testing untestable - patterns and use cases analysis

Score 0.20

ⓘ The match becomes increasingly accurate as the similarity **score** approaches zero.

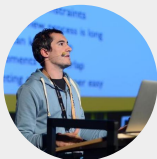

- "I don't use AWS Lambda because it's hard to test"

- "I'm mocking DynamoDB so it's not a real test"

- "The feedback loop is terrible, the developer experience is awful"

Well well well, that's not true!

In this presentation, we will address those common beliefs by providing production ready examples: we build a Pizza api with Lambda and DynamoDB.

MAXIME DAVID   
Datadog

Maxime David is a life-long open source aficionado and Senior Software Engineer advancing serverless topics at Datadog. He's keen on code profiling, and
