Inception! Use serverless to build a Lambda coldstart benchmark 🍌 across all runtimes

Maxime David

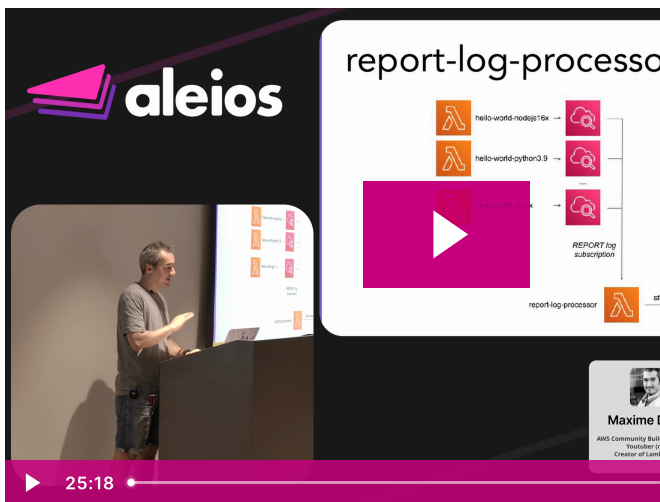

Abstract

Coldstart time! We all want to minimize it while using AWS Lambda. I'm sure you've read ton of blog posts about coldstart benchmarks but unfortunately those are likely to be outdated.

What about building an >always up-to-date< live benchmark using Lambda? Come to see it!

Date: June 22, 2023

This talk was hosted at an aleios event. The speaker / company does not work for aleios.

Maxime David

Max is a life-long open source aficionado and Senior Software Engineer advancing serverless topics at Datadog. He's keen on code profiling, and believes that performance in software matters. When he's not optimizing software, he likes to try every banana bread he can find.

But wait... there's more...
